

LIQUICAL™

Guaranteed Analysis

Total Nitrogen (N).....8%

8.00% Nitrate Nitrogen

Total Calcium (Ca).....10%

10.00% Water Soluble Calcium

DERIVED FROM:
Calcium Nitrate

WEIGHT PER GALLON:
12.20 lbs.

Recommended Rates

For use in a balanced fertility program for turf, landscapes and nursery crops that require calcium. For best results, follow soil test and tissue analysis recommendations.

Turf: Golf, Commercial, Sod, Residential

Use 4-6 ounces of LIQUICAL™ per 1,000 sq ft per application to actively growing turf. Two applications are recommended. If deficiencies occur, more frequent applications are needed. Make an application to greens or tees just prior to heavy play or a tournament. A minimum of one (1) gallon of water per 1,000 sq ft is recommended for best coverage. More if desired.

Ornamental or Nursery Crops: Use 2-4 pints of LIQUICAL per 100 gallons of water. Cover foliage until runoff for thorough coverage. LIQUICAL may be used for bedding plants, container-grown or field-grown plants.

Soil Application: Make an application of 1-2 gallons per acre. Make a preplant application before seeding, sodding or transplanting of annuals, perennials or nursery crops.

USE A MINIMUM OF 44 GALLONS OF WATER PER ACRE WITH GROUND SPRAY EQUIPMENT.

For prevention and correction of Calcium deficiencies. Does not contain Chlorides.
